

# Save The Date!!

**FEBRUARY 26, 2008 / 8AM – 3:30PM**

## Rehabilitation Medicine Issues in Acute Care: Prevention of Common Complications and Facilitation of Recovery Methodist Rehabilitation Center, Conference Room A & B

### Speakers: Samuel Grissom, MD

Following this lecture, participants will be able to:

- Describe the common secondary complications that arise during acute care hospitalization which can slow or limit a patient's rehabilitation and functional recovery
- Identify the prophylactic measures for common secondary complications that often begin during acute care hospitalization so that patient participation in rehabilitation can be optimized
- Discuss the management of common secondary complications that may arise during acute care hospitalization so that functional recovery can be enhanced

### Clea Evans, PhD

Participants will be able to:

- Identify common behavioral problems after neurologic injury and describe organic and psychologic factors that underlie these behaviors s rehabilitation and functional recovery
- Discuss how to develop a behavioral modification program for a specific patient using principles of applied behavioral analysis
- List environmental and communication tools for managing difficult behavior in patients with neurologic injuries
- Identify 3 common warning signs of depression that can be present in hospital/rehabilitation settings, and discuss differential diagnoses that have symptom overlap.

### Sandra Culver, PharmD

Following this lecture, participants will be able to:

- Review the pharmacological actions and potential adverse events of anticoagulant therapies for prophylaxis and treatment of DVT
- Discuss practical applications for decreasing risk of adverse events in the anticoagulated patient
- Identify future drugs used for treatment of DVT
