2008

Self-Esteem and Stroke Recovery: Current Theory and Research in the Stroke Rehabilitation Setting

Chad Vickery, PhD

Tuesday, July 22, 2008

NOON

Methodist Rehabilitation Center Second Floor Conference Room

Series Objective:

Promote clinical excellence for patients receiving neurological rehabilitation by

1. Enhancing knowledge of brain-behavior relationships
2. Enhancing the ability of clinicians to critique the scientific literature
3. Enhancing knowledge of evidenced based practice for treating patients in rehabilitation settings

Learning Objectives:

Participants will be better able to:

1. Identify psychological factors relating to depression and functional outcome in the stroke rehabilitation setting
2. Identify how self-esteem may affect the stroke survivor's emotional adjustment and functional recovery
3. Identify future research clarifying the role of self-esteem and recovery after stroke.

Commercial Support

Neither Dr. Vickery nor members of the planning committee have commercial support relationships to disclose.

Continuing Education Credit

Satisfactory completion of this activity requires a minimum attendance at 90% of the lecture and completion of an activity assessment and self assessment of achievement of learning objectives. Satisfactory completion of the activity is required for continuing education credit to be awarded.
